Sovet was born at the end of the '80s to explore the expression possibilities of glass in the contemporary furnishing. Since the beginning of the years 2000 it starts the collaboration with important international designers and introduces other materials alongside glass, widening its perspective under the sign of creativity and continuous evolution. From "New shapes for glass" to "New shapes for design", in the last 30 years the company has undergone a constant growth, transforming itself from a company identified with glass to an internationally successful 360-degree design company, with new solutions both for home and contract environment which combine minimalism and an accurate materials selection.
